Statement of Work

Implementation of your
ConnexAI platform

Welcome to ConnexAI

A Technology Partnership

Omnichannel will reshape your organisation's day-to-day operations; from increasing your team's productivity to having the ability to customise business strategies to adapt to your customer needs.

The ConnexAI platform is a powerful tool that will provide a more in-depth insight and analysis of your customers' requirements than ever before, enabling your teams to provide industry leading service and increase your customer satisfaction.

- ✓ Introduce a highly personalised service by appointing an experienced Technical Services Engineer to manage all your training and onboarding requirements
- ✓ Drive compliance to meet your clients SLAs with performance and productivity monitoring features
- ✓ Reduce the time it takes per interaction with our productivity enhancing algorithms and technology
- ✓ Give your team greater peace of mind with full 24/7 support for every user
- ✓ More in-depth insight into your campaigns, teams and strategy; providing your management team with much more at just a glance

As market leaders in contact centre solutions, we understand how to positively shape every customer interaction experience by harnessing the right insights, expertise and technology.

From the start of our partnership, we will work together to optimise feature usage and drive productivity, delivering success throughout your teams.

What's more, with a **client retention rate of over 97%**, we are renowned for exceptional service and the powerful technology we offer.

Statement of Work

Project Overview

Deliverables

ConnexAI will implement the following project deliverables with **<client name>**:

Phase 1

- Setup and configuration of Voice
- Setup and configuration of SMS
- Setup and configuration of Email
- Setup and configuration of Live Chat
- Setup and configuration of WhatsApp
- Setup and configuration of Facebook
- Setup and configuration of Instagram
- Setup and configuration of Dashboard Builder
- Setup and configuration of Quality
- Setup and configuration of Athena AI Agent
- Setup and configuration of Athena AI Voice (TTS)
- Setup and configuration of Athena Speech Recognition (ASR)
- Setup and configuration of Athena AI Guru
- Setup and configuration of Form Builder
- Setup and configuration of LCADB
- Setup and configuration of Knowledge
- Setup and configuration of Monitor
- Setup and configuration of Ticketing
- Assistance with the setup and configuration of **<product>** integration
- **Remote>** training with Technical Services Engineer
- Further dedicated Technical Services Engineer support for full Go-Live

Scope

Phase 1

Voice

Your ConnexAI Technical Services Engineer will deploy Voice to **<client name>**.

Configuration

- ConnexAI will provide **<client name>** with **<number>** CLIs for inbound and outbound dialling. Upon request, additional CLIs can be provisioned by our carrier team if required.
 - **<Number of CLIs>** x **<area code>** area code
- Your Technical Services Engineer will provide training to enable the creation of **<inbound and outbound>** campaigns:
 - **<List campaign information>**
- WebRTC will be configured to enable agent audio through a web browser.
- **A SIP trunk will be configured for the purpose of servicing inbound traffic via pointing of CLIs to ConnexAI's IP address.**
- **<client name>** will port **<amount of numbers>** CLI numbers to ConnexAI. The ConnexAI Numbers team will contact **<client name>** to obtain additional information in order to initiate the porting process.
- Whilst the porting process is underway, **<client name>** is to route traffic to ConnexAI by: **<pick an option below>**
 - **[Delete if not applicable]** Diverting existing CLIs to a CLI provided by ConnexAI
 - **[Delete if not applicable]** Configuration of a SIP trunk to point the CLIs to ConnexAI's IP address. If a SIP trunk is configured, ConnexAI will need the IP addresses from the current **<client name>** voice platform to whitelist

Requirements

- Audio files for hold music, welcome messages, IVR prompts and out of hours messages.
- Confirmation of the preferred CLI number area code(s).
- A list of the numbers that are to be ported to ConnexAI.
- Sufficient interaction credit needs to be added to the account.

Scope

Phase 1

SMS

Your ConnexAI Technical Services Engineer will deploy SMS to **<client name>**.

Configuration

- ConnexAI's carrier team will provision **<number>** dedicated SMS long number **(s)** for **<client name>**.
- Your Technical Services Engineer will discuss the different SMS strategies and set up out of hours and in hours SMS messages during training.

Requirements

- Templates to be used for canned responses.
- **Confirmation of whether SMS needs to be outbound or two way conversational.**
- Sufficient interaction credit needs to be added to the account.

Email

Your ConnexAI Technical Services Engineer will deploy Email to **<client name>**.

Configuration

- ConnexAI will integrate with **<client name>**'s current mail servers to allow emails to be sent and received from the ConnexAI platform.
- Your Technical Services Engineer will assist with the setup and assignment of auto and canned responses as required.

Requirements

- Confirmation of the usernames and passwords for email accounts.
- Confirmation of address for both IMAP and SMTP connections.
- Confirmation of relevant ports for IMAP and SMTP connectivity.
- An email account which will be used for testing purposes.
- Templates to be used for canned responses.
- Access and permissions to your admin portal for your email platform for the purpose of multi factor authentication e.g. your Azure directory.

Scope

Phase 1

Live Chat

Your ConnexAI Technical Services Engineer will deploy Live Chat to <client name>.

Configuration

- The ConnexAI Live Chat application will be configured and the associated script made available to <client name> for deployment on its website (<https://www.<client name>.com>).
- ConnexAI Live Chat enables configuration for a user to concurrently service multiple Live Chats.
- Canned responses, intelligent routing and SLA functionality are all available.

Requirements

- Test website environment provided by <client name> which will be used for testing.
- <client name>'s current Live Chat workflow.

WhatsApp

Your ConnexAI Technical Services Engineer will deploy WhatsApp to <client name>.

Configuration

- The WhatsApp for Business API will be set up to enable two-way WhatsApp conversations.
- Your Technical Services Engineer will provide training on the creation and management of templates.
- The ConnexAI carrier team will provision a new WhatsApp number for <client name> and assist with the number set up process.

Requirements

- Verified Meta Business account.
- Provide admin access and permissions to verified Meta Business account.
- Confirmation of the preferred WhatsApp number area code(s).
- Template WhatsApp messages.
- Sufficient interaction credit needs to be added to the account.

Scope

Phase 1

Facebook

Your ConnexAI Technical Services Engineer will deploy Facebook to **<client name>**.

Configuration

- **<client name>** will link up a Facebook Page to the ConnexAI Social Service application within the CXM platform. Once the account is connected, **<client name>** will have the ability to:
 - Respond to Facebook wall post comments
 - Send and receive Facebook Messenger messages
- The Technical Services Engineer can assist **<client name>** in completing the setup of your Meta Business account if required.

Requirements

- Verified Meta Business account.
- Provide admin access and permissions to verified Meta Business account.
- Facebook Business page.
- Sufficient interaction credit needs to be added to the account.

Instagram

Your ConnexAI Technical Services Engineer will deploy Instagram to **<client name>**.

Configuration

- **<client name>** will link up a Facebook Business page and Instagram Business page to the ConnexAI Social Service application within the CXM platform.
- Once the accounts are connected, **<client name>** will have the ability to perform the following actions:
 - Sending Instagram direct messages
 - Replying to comments on Instagram posts

Requirements

- ConnexAI will provide **<client name>** with the ability to connect its Instagram Business account to the ConnexAI system.
- Verified Meta Business account.
- Provide admin access and permissions to verified Meta Business account.
- Instagram Business page.
- Sufficient interaction credit needs to be added to the account.

Scope

Phase 1

X (Twitter)

ConnexAI will provide <client name> with the ability to connect its X (Twitter) account to the ConnexAI system.

The X (Twitter) functionality is not yet fully released on the ConnexAI platform. As soon as this is released, the Technical Services Engineer can assist <client name> in completing the setup of the X (Twitter) functionality within the ConnexAI system.

Dashboard Builder

Your ConnexAI Technical Services Engineer will deploy Dashboard Builder to <client name>.

Configuration

- Dashboard Builder will allow the ability to create and build personalised dashboards that help present your CXM data.
- Dashboards are made up of tiles, with each tile providing key metrics on CXM activity. This includes:
 - Call data
 - User statistics
 - Interaction data
 - CNXI Live data
- <client name> will be able to present these metrics in a variety of different formats, such as line graphs and pie charts.

Requirements

- Any examples of dashboards or wallboards currently used by <client name>.

Scope

Phase 1

Quality

Your ConnexAI Technical Services Engineer will deploy Quality to **<client name>**.

Configuration

- ConnexAI will provide ability to create and manage scorecards in the Quality module in order to measure the quality of agents' interactions.
- The Assessment Center can be used to assess quality of statistics related to agent performance such as call scores and sentiment scores of agent calls.
- Your Technical Services Engineer will also assist in the set up of users, teams and roles.

Requirements

- Example scorecards.
- Information on the current Quality Management process.

Quality Management (WFO)

Your ConnexAI Technical Services Engineer will deploy Quality Management (WFO) to **<client name>**.

Configuration

- ConnexAI will provide ability to create and manage scorecards in WFO in order to measure the quality of agents' interactions.
- The QM Assessment Center can be used to assess quality of statistics related to agent performance such as call scores and sentiment scores of agent calls.
- Your Technical Services Engineer will also assist in the set up of user, teams and roles.

Requirements

- Example scorecards.
- Information on current Quality Management process.

Scope

Phase 1

Athena AI Agent

Your ConnexAI Technical Services Engineer will deploy AI Agent to **<client name>**.

Configuration

- AI Agent will allow **<client name>** to utilise conversational AI to converse with customers.
- ConnexAI's AI Agent Control Panel will allow users to build their own journeys and train personalised LLM on their own data.
- Your Technical Services Engineer will assist in the creation of Users, Roles and tracking data through AI Reporting.
- Your Technical Services Engineer will also provide training on the creation of journeys, training data and managing slot intents.

Requirements

- Documented customer journeys.
- Knowledge Base Articles for your organisation and processes.

Athena AI Voice (TTS)

Your ConnexAI Technical Services Engineer will deploy Athena AI Voice to **<client name>**.

Configuration

- AI Voice will allow **<client name>** to utilise AI Text-To-Speech to respond to customers in a variety of custom AI Voices.
- ConnexAI's AI Voice node allows responses to be created to respond to transcripts captured using Athena ASR. These responses can be personalised to create a voice to suit your brand.

Requirements

- Documented TTS Scenarios.
- Audio Files ConnexAI can use to provide custom voices.

Scope

Phase 1

Athena Speech Recognition (ASR)

Your ConnexAI Technical Services Engineer will deploy Athena ASR to **<client name>**.

Configuration

- Automatic Speech Recognition (ASR) will allow **<client name>** to capture responses from customers as they speak.
- ConnexAI's Athena ASR node allows these responses to be utilised to create sophisticated interactive voice response (IVR) menus.

Requirements

- Documented IVR flows.
- Audio files for IVR prompts and out of hours messages.

Scope

Phase 2

Integration

<client name> require ConnexAI to integrate with <product>.

A full specification detailing the setup of the integration will be agreed between both parties before any development work begins.

Once the specification is agreed, ConnexAI will assist <client name> with completing the integration.

Requirements

Infrastructure & Access Requirements

System Access

- Interaction credit proforma and licence invoice need to be paid
- IP Address Whitelisting
 - Access to non-Public Access ConnexAI servers is restricted by IP address, the head office IP address will be whitelisted for access.
 - Any remote agents who are not connecting to a non-Public Access server via the head office will require a VPN (to provide static IP address) and their IP address whitelisting before they are able to connect to any new servers.

Hardware

- Windows 10+
- i5 Processor
- 8GB RAM
- USB headsets

Internet

- 0.25Mbps per agent
- CAT5e+ Cabling
- Static IP

Statement of Work

Support

Support Service

24/7 Support

- The ConnexAI dedicated Support team are on hand 24/7 to assist you with any queries you may have, assistance you may need or issues you need resolving.
- You can contact your Support team via call, email and live chat.

Support Portal

- Utilise our support portal to browse knowledge base article (KBAs) which provide detailed information on how to get the most out of your ConnexAI system.
<http://support.connex.ai/>

Support Ticket Submissions

- When submitting tickets to the ConnexAI Support team via email, we kindly ask if you could please do so using the following template. If you do not have all the required information, please just provide as much information as possible.
- Submitting tickets with this information will assist the Support team in troubleshooting and will speed up the investigation process.
