

Implementation of your MassaPro platform

Field	Value
Client	ITNav
Client Demo	<demo>
Project	ITNav
Date	2026-10-09
Version	v1.0
Prepared By	Ezequiel Sznaider

Welcome to MassaPro

A Technology Partnership

Omnichannel will reshape your organisation's day-to-day operations; from increasing your team's productivity to having the ability to customise business strategies to adapt to your customer needs. The MassaPro platform is a powerful tool that will provide a more in-depth insight and analysis of

your customers' requirements than ever before, enabling your teams to provide industry leading service and increase your customer satisfaction.

As market leaders in contact centre solutions, we understand how to positively shape every customer interaction experience by harnessing the right insights, expertise and technology. From the start of our partnership, we will work together to optimise feature usage and drive productivity, delivering success throughout your teams.

What's more, with a client retention rate of over 97%, we are renowned for exceptional service and the powerful technology we offer.

Statement of Work

Project Overview

This Statement of Work ("SOW") describes the services that MassaPro will deliver to ITNav for the ITNav initiative.

Deliverables

MassaPro will implement the following project deliverables with ITNav:

Phase 1

Statement of Work

Support

24/7 Support

The MassaPro dedicated Support team are on hand 24/7 to assist you with any queries you may have, assistance you may need or issues you need resolving.

You can contact your Support team via call, email and live chat.

Support Portal

Utilise our support portal to browse knowledge base articles (KBAs) which provide detailed information on how to get the most out of your MassaPro system.

<https://support.massapro.com/>

Support Ticket Submissions

When submitting tickets to the MassaPro Support team via email, we kindly ask if you could please do so using the following template. If you do not have all the required information, please just provide as much information as possible.

Submitting tickets with this information will assist the Support team in troubleshooting and will speed up the investigation process.
